

The Fire

by Katherine Neville

About the Book

The spectacular chess game in **The Eight** --- the quest for the bejeweled chess set that once belonged to Charlemagne --- has captivated readers around the world with its exotic locales, fascinating historic figures, and labyrinthine plot. Long a book club favorite for the richness of its international themes, **The Eight** may also have "paved the way" for the reemergence of a timeless genre: the Quest novel.

--*Publishers Weekly*

Today, that same "Game" resumes, in force, in the dazzling sequel: **The Fire**. When the most critical piece of Charlemagne's chess set, the Black Queen, suddenly emerges, the quest leads us from 8th century Baghdad to the wilds of Colorado, to Albania, Russia, Rome, Morocco, and into a secret wilderness no one knows about --- hidden at the very heart of Washington, DC.

Discussion Guide

1. Mother-Daughter relations:

Alexandra "Xie" Solarin, the protagonist of **The Fire**, was a child chess prodigy who was encouraged to play chess by everyone except her mother, Cat Velis. We know what dangers Cat was afraid of for her daughter --- but Alexandra does not realize this, and she severs relations with her mother early on. Alexandra's father, likewise, had lost contact with his mother at an early age. And Sage Livingston, Xie's arch-nemesis, has her own maternal hang-ups with her mother Rosemary.

What deep interconnections between mothers and their offspring are explored within **The Fire**? And how do these convey the message of the book's underlying theme?

2. Chess --- the Cosmic Game:

Why use chess as a structure for the novel? The chess board itself and the pieces all play roles as characters and plot elements in **The Fire**. To Alexandra, who thinks like a chess player, they mean something quite different than to the rest of us. How many different situations do we find which relate to everything from our ordinary "chess-like" tactics and strategies in life, up to the "cosmic" theme of chess: from moves that are made by the characters, to the layout and design of cities? How are these connected within the story?

3. Cuisine --- the root of all Good and Evil:

Neville's books all deal with food --- but in **The Fire**, the heroine, Xie, is actually an apprentice to a master chef in Washington DC. In most novels, food is rarely mentioned. But in this book, cuisine and its exquisite preparation appear in almost every scene. Why did Alexandra transition from being child chess prodigy to being a chef? How are the preparation and ingestion of food and liquor so critical to the story?

4. Byron and Freedom:

Lord Byron the poet died in Greece and will always be associated with the War of Greek Independence against Turkey, as depicted in **The Fire**. But as the book describes too, he also supported the Italians against their Austrian overlords, and many others. What critical role, in that respect, does Byron play in the underlying theme of the book? What is the importance of the message Shelley sends to him from his watery grave?

5. Catherine the Great and Power:

Catherine the Great, "Empress of all the Russias," is one of the few transitional characters to play an important role in both **The Eight** and **The Fire**. What is her key role --- and how does it affect the change from one idea of power to another?

6. New York City and Washington DC:

The important early scenes in **The Eight** are set in New York where Cat Velis is a young computer expert --- public places like the United Nations, the Diamond District, the Plaza, Central Park South. In **The Fire**, Cat's daughter Xie is more familiar with hidden places in Colorado and Washington DC. What parallels can be drawn from the contrasts between these two images?

7. Christianity and Islam:

The chess set of Charlemagne --- the first Holy Roman Emperor --- was not created (as we learn in **The Fire**) for Charlemagne. It was created in 775 AD in the then-brand-new city of Baghdad. What is the significance of the connection between the importance of this chess set for Islam --- which created it --- and Christianity --- which possessed it since the time of the first Emperor of the West?

8. "To Laugh or not to Laugh":

Why does Neville constantly use humor throughout these books --- even in situations which might seem to be dire? What is the importance of laughter in the midst of tragedy? What role do comedy, satire, and irony play in the telling of serious stories from our past?

Author Bio

Katherine Neville is the author of **THE EIGHT**, **THE MAGIC CIRCLE** (a *USA Today* bestseller) and **A CALCULATED RISK** (a *New York Times* Notable Book). **THE EIGHT** has been translated into more than thirty languages. In a national poll in Spain by the noted journal *El País*, **THE EIGHT** was voted one of the top ten books of all time. Neville lives in Virginia and Washington, D.C.

Critical Praise

"Four stars. Intrigue and mystery fill the sequel to **The Eight**. In this detailed, engrossing follow-up, Neville's globe-spanning descriptions of Russia, the Middle East and the United States are vivid, her characters unusual and the plot intricately woven."
